**SAVE THE DATE! – Thursday, June 22, 2023**  
The Butterfield Park District is Hosting the **14<sup>th</sup> Annual.**  
**World's Largest Swimming Lesson™** to Help Prevent Childhood Drowning

**WHAT:**

**The World's Largest Swimming Lesson™ (WLSL)** serves as a crucial platform to help the aquatics industry fight the leading cause of childhood death for kids ages 1-4 by building awareness about the fundamental importance of teaching children to swim and parental supervision around water.

**WHY:**

Drowning is fast, silent, and preventable. The WLSL program works to raise awareness of the risks involved with water, the critical importance of teaching young children water safety and swimming skills and the crucial need for guardian vigilance always when supervising children in and around water. The Butterfield Park District is joining TEAM WLSL™ in their mission to spread the message *Swimming Lessons Save Lives™* to millions of kids and adults to help prevent drowning.

**About The World's Largest Swimming Lesson™**

Since 2010, more than 354,000 children and adults have participated in lifesaving WLSL lessons, generating more than 2.5 billion media impressions about the vital importance of learning to swim. Learn more about this phenomenal program by visiting [www.butterfieldpd.com](http://www.butterfieldpd.com).

**The problem is real:** Per the CDC, more children ages 1-4 die from drowning than any other cause of death, for children ages 5-14, drowning is the second leading cause of unintentional injury death after motor vehicle crashes. For every child under age 18 who dies from drowning, another 7 receive emergency department care for nonfatal drowning. Drowning is an even greater threat in other countries around the world. According to the World Health Organization, drowning is the 3<sup>rd</sup> leading cause of unintentional injury death worldwide, accounting for 7% of all injury-related deaths.

**Swimming lessons make a difference:** Participation in formal swimming lessons can reduce the risk of drowning among children aged 1-4 by up to 88%.

**Many lack basic swimming skills:** According to a 2020 research study by the American Red Cross, more than half (54%) of kids ages 4-17 cannot perform the basic water safety skills they need to save their life.

## Express yourself through Dance With our Mini Moves Program

Feel like a star here and embrace your inner self through dance!

The district dance programs are offered in conjunction with

### The 3 C's:

#### **Compassion, Connection and Confidence:**

**Compassion:** Research has recently shown that people with dance experience are better at interpreting the emotions of others. Expressing our feelings through dance can make us more sensitive to when others are expressing themselves, too.

**Connection:** Dance is fueled by emotion. It's a process of feeling, and then moving through that feeling and thus sharing it with others. Dance allows others to find genuine connection with how we're feeling — whether they relate at that moment, or it reminds them of the moments when they shared that feeling themselves. Dance can be used to express any mood: sadness, joy, anger, fear, and more.

**Confidence:** When you're feeling down, it may feel like dancing is the last thing you want to do. However, dance may be that final "oomph" to get you out of a funk. Not only does dance create a boost in mood-boosting chemicals like endorphins and serotonin, but it helps create a sense of community during times when people feel otherwise isolated. Cognitive development plays a role in the emotional healing elements of dance as well. Focusing the body and mind on certain movements allows for temporary distraction from emotional pain and repetitive thought cycles, providing momentary solace and confidence building.
